1992 ANNUAL INDEXES

Textile Research Journal

Volume 62

AUTHOR AND TITLE INDEX, pp. 776–782

SUBJECT INDEX, pp. 782–790

MONTH	PAGES	MONTH	PAGES
January	1–60	July	371–432
February	61–122	August	433–494
March	123–184	September	495–556
April	185–246	October	557–618
May	247–308	November	619–696
June	309–370	December	697–790

AUTHOR AND TITLE INDEX

Agarwal, Pankaj Extraction and Evaluation of Fibers from Sugar Cane (*Collier, Collier, Lo*) 741

Ajayi, Joseph O. Effects of Fabric Structure on Frictional Properties 87

Fabric Smoothness, Friction, and Handle 52

Alston, Peter V. Effect of Yarn Spinning System on Pill Resistance of Polyester/Cotton Knit Fabrics 105

Annis, Patricia A. Influence of Textile Structure on Single Fiber Transfer from Woven Fabrics (*Bresee, Cooper*) 293

Apcar, F. Moisture Buffering Behavior of Hygroscopic Fabric During Wear (*Li, Holcombe*) 619

Araki, H. Dyeing Rate of Nylon 6 Fabric and Yarn Assemblies with *p*-Aminoazobenzene (*Sasaki, Morikawa*) 736

Dyeing Rate of Nylon 6 Yarn with *p*-Aminoazobenzene (*Sasaki, Morikawa, Miyaguchi*) 657

Arifoglu, Mustafa Reaction of Thiourea with Hydrogen Peroxide: ^{13}C NMR Studies of an Oxidative/Reductive Bleaching Process (*Marmer, Dudley*) 94

Sequential Oxidative/Reductive Bleaching and Dyeing of Wool in a Single Bath at Low Temperatures (*Marmer*) 123

Axelson, Rick D. *In Vivo* Cutaneous Response to Fabric Part V: Effect of Fiber Type and Fabric Moisture Content on Stratum Corneum Hydration (*Hatch, Markee, Prato, Zeronian, Maibach, Kuehl*) 638

Bag, S. C. Tensile Behavior of Adhesive Bonded Jute Nonwovens (*Sengupta, Sinha, Samajpati*) 457

Balasubramanya, R. H. Effect of an Alkali Treatment on the Enzymolysis of Never-Dried Cotton Cellulose (*Bhatawdekar, Sreenivasan, Paralikar*) 290

Banks-Lee, P Analysis of Fabric Deformation in a Roll-Making Operation Part III: Effect of Viscoelasticity (*Ghosh, Peng*) 669

Barella, A. Twist and Linear Density Coefficient of Variation-Length Curves of Polyester/Cotton Yarns Spun by Different Processes (*Manich, de Castellar*) 115

Barker, Roger L. Handle of Weft Knit Fabrics (*Chen, Smith, Scruggs*) 200

Bebbington, E. M. O. Structural Morphology of High Speed Spun Polyester Fibers (*Mukhopadhyay, Foster*) 403

Bertoniere, Noelie R. Pore Structure of Cotton Fabrics Crosslinked with Formaldehyde-Free Reagents (*King*) 349

Bhatawdekar, S. P. Effect of an Alkali Treatment on the Enzymolysis of Never-Dried Cotton Cellulose (*Sreenivasan, Balasubramanya, Paralikar*) 290

Boguslavsky, A. Measuring Medullation in Mohair with Near Infrared Reflectance Analysis (*Botha, Hunter*) 433

Bosch, P. Large Unilamellar Vesicle Liposomes for Wool Dyeing: Stability of Dye-Liposome Systems and Their Application on Untreated Wool (*de la Maza, Parra, Coderch*) 406

Botha, A. Measuring Medullation in Mohair with Near Infrared Reflectance Analysis (*Boguslavsky, Hunter*) .. 433

Bresee, Randall R. Influence of Textile Structure on Single Fiber Transfer from Woven Fabrics (*Annis, Cooper*) 293

Broughton, Roy M., Jr. Mechanism of Yarn Failure (*El Mogahzy, Hall*) 131

"Regressional" Observations of HVI Fiber Properties, Yarn Quality, and Processing Performance of Medium Staple Cotton Part I: HVI Fiber Parameters (*El Mogahzy*) 218

Brown, R. S. Reducing HVI Strength Variability by Sensing Humidity (*Taylor, Godbey*) 80

Cardamone, Jeanette M. Reacting Cotton Cellulose with Lignin-Based Polyurethane 371

Carnaby, Garth A. Compressional Energy of the Random Fiber Assembly Part I: Theory (*Lee*) 185

Part II: Evaluation (*Lee, Tandon*) 258

Finite Element Modeling of an Oriented Assembly of Continuous Fibers (*Djaja, Moss, Carr, Lee*) 445

Carr, A. J. Finite Element Modeling of an Oriented Assembly of Continuous Fibers (*Djaja, Moss, Carnaby, Lee*) .. 445

Chattopadhyay, R. Air-Jet Texturing of Sirospun Yarn (*Sengupta, Sensarma*) 328

Chen, Cheng-Chi Properties of Cotton Fabrics Crosslinked with Different Molecular Chain Lengths of Aldehyde Agents Part I: Physical Properties and Agent Distribution (*Shyu*) 469

Part II: Dyeing Kinetics of Direct Dyes from Finite Baths on Treated Fabrics (*Liang, Hwang, Ju*) 547

Chen, Pau-Lin Handle of Weft Knit Fabrics (*Barker, Smith, Scruggs*) 200

Chereisky, Z. Yu. Behavior of Fibers in Active Media Under Load—A Dynamic Gel Self-Organizing Structure (*Vaykhansky, Frenkel, Dobrovolskaya*) 356

Part II: Dyeing Kinetics of Direct Dyes from Finite Baths on Treated Fabrics (*Liang, Hwang, Ju*) 547

Chen, Pau-Lin Handle of Weft Knit Fabrics (*Barker, Smith, Scruggs*) 200

Chereisky, Z. Yu. Behavior of Fibers in Active Media Under Load—A Dynamic Gel Self-Organizing Structure (*Vaykhansky, Frenkel, Dobrovolskaya*) 356

Molecular Model for Polymer Fiber Behavior in Active Media Under Load (*Darinsky, Lyulin, Vaykhansky, Dobrovolskaya*) 392
Choi, Hyung-Min Nonformaldehyde Polymerization-Cross-linking Treatment of Cotton Fabrics for Improved Strength Retention 614
Coderch, L. Degradative Wool Shrinkproofing Processes Part I: Protein Modification (*Pinazo, Erra*) 302
Part II: Lipid Modification (*Soriano, Pinazo, Parra, Erra*) 704
Large Unilamellar Vesicle Liposomes for Wool Dyeing: Stability of Dye-Liposome Systems and Their Application on Untreated Wool (*de la Maza, Parra, Bosch*) 406
Collier, Billie J. Extraction and Evaluation of Fibers from Sugar Cane (*Collier, Agarwal, Lo*) 741
Collier, John R. Extraction and Evaluation of Fibers from Sugar Cane (*Collier, Agarwal, Lo*) 741
Cookson, P. G. Effects of Synthappret BAP-Based Treatments on the Cuff-Edge Felting and Mechanical Properties of a Lightweight Woven Wool Fabric (*De Boos*) 595
Relationships Between Hygral Expansion, Relaxation Shrinkage, and Extensibility in Woven Wool Fabrics 44
Cooper, Terry R. Influence of Textile Structure on Single Fiber Transfer from Woven Fabrics (*Annis, Bresee*) 293
Cornell, Hugh J. Effects of Processing on the Bound and Free Fatty Acid Levels in Wool (*Negri, Rivett*) 381
Cunniff, Philip M. An Analysis of the System Effects in Woven Fabrics Under Ballistic Impact 495

Darinsky, A. A. Molecular Model for Polymer Fiber Behavior in Active Media Under Load (*Lyulin, Vaykhansky, Chereisky, Dobrovolskaya*) 392
Davis, A. C. Deflection-Force Measurements and Observations on Kevlar 29® Parachute Fabrics (*Ericksen, Warren*) 628
Dawson, R. M. Filling Patterning with a Replicate Color: Maximum Increase in Minimax Magazine Movement 522
de Castellar, M. D. Elastic Recovery and Inverse Relaxation of Polyester Staple Fiber Rotor Spun Yarns (*Manich*) 196
Optimizing Hercosett/Optical Brightener Agent/Hydrogen Peroxide Systems Applied to Untreated Wool for Shrinkproofing (*de la Maza, Manich, Parra*) 162
Twist and Linear Density Coefficient of Variation-Length Curves of Polyester/Cotton Yarns Spun by Different Processes (*Manich, Barella*) 115
De Boos, A. G. Effects of Synthappret BAP-Based Treatments on the Cuff-Edge Felting and Mechanical Properties of a Lightweight Woven Wool Fabric (*Cookson*) 595
de la Maza, A. Large Unilamellar Vesicle Liposomes for Wool Dyeing: Stability of Dye-Liposome Systems and Their Applicatioin on Untreated Wool (*Parra, Bosch, Coderch*) 406
Optimizing Hercosett/Optical Brightener Agent/Hydrogen Peroxide Systems Applied to Untreated Wool for Shrinkproofing (*Manich, Parra, de Castellar*) 162
De Luca, Lloyd B. Comparison of Yarn Tenacity Data Obtained Using the Uster Tensorapid, Dynamat II, and Scott Skein Testers (*Thibodeaux*) 175
The Relative Importance of Fiber Friction and Torsional and Bending Rigidities in Cotton Silver, Roving, and Yarn (*Thibodeaux*) 192
Dhingra, R. A Psychophysical Evaluation of the Tactile Qualities of Hand Knitting Yarns (*Jacobsen, Fritz, Postle*) 557
Djaja, R. G. Finite Element Modeling of an Oriented Assembly of Continuous Fibers (*Moss, Carr, Carnaby, Lee*) 445
Dobrovolskaya, I. P. Behavior of Fibers in Active Media Under Load—A Dynamic Gel Self-Organizing Structure (*Vaykhansky, Frenkel, Chereisky*) 356
Molecular Model for Polymer Fiber Behavior in Active Media Under Load (*Darinsky, Lyulin, Vaykhansky, Chereisky*) 392
Dowdell, Bruce Influence of Ageing and Lint Accumulation on the Fastening Strength of Hook and Loop Fasteners (*Taylor, Johnson*) 766
Dudley, Robert L. Reaction of Thiourea with Hydrogen Peroxide: ^{13}C NMR Studies of an Oxidative/Reductive Bleaching Process (*Arifoglu, Marmer*) 94

El Mogahzy, Yehia E. Effect of Creep-Related Overdrying in Sizing on Warp Characteristics and Weaving Performance (*Perkins*) 317
Mechanism of Yarn Failure (*Broughton, Hall*) 131
Optimizing Cotton Blend Costs with Respect to Quality Using HVI Fiber Properties and Linear Programming Part I: Fundamentals and Advanced Techniques of Linear Programming 1
Part II: Combined Effects of Fiber Properties and Variability Constraints 108
"Regressional" Observations of HVI Fiber Properties, Yarn Quality, and Processing Performance of Medium Staple Cotton Part I: HVI Fiber Parameters (*Broughton*) 218
Using Off-Line Quality Engineering in Textile Processing Part I: Concepts and Theories 266
Ericksen, R. H. Deflection-Force Measurements and Observations on Kevlar 29® Parachute Fabrics (*Davis, Warren*) 628
Erra, P. Degradative Wool Shrinkproofing Processes Part I: Protein Modification (*Coderch, Pinazo*) 302
Part II: Lipid Modification (*Coderch, Soriano, Pinazo, Parra*) 704

Foster, P. W. Structural Morphology of High Speed Spun Polyester Fibers (*Mukhopadhyay, Bebbington*) 403
Frenkel, S. Ya. Behavior of Fibers in Active Media Under Load—A Dynamic Gel Self-Organizing Structure (*Vaykhansky, Chereisky, Dobrovolskaya*) 356
Fritz, A. A Psychophysical Evaluation of the Tactile Qualities of Hand Knitting Yarns (*Jacobsen, Dhingra, Postle*) 557
Frydrych, Iwona A New Approach for Predicting Strength Properties of Yarn 340
Fujii, Tomiko Effects of Grafting with Acrylic Acid on Removal of Oily Soil from Polyester Fabric (*Kawase, Uchita, Minagawa*) 663
Fukatsu, Kazuhiko Dyeing and Mechanical Properties of Cotton Modified for Cationic Dyes with Hydrophobic and Acidic Groups 135

Ghosh, Subhas RotorRing Measurement of Fiber Cohesion and Bulk Properties of Staple Fibers (*Rodgers, Ortega*) 608
Ghosh, T. K. Analysis of Fabric Deformation in a Roll-Making Operation Part III: Effect of Viscoelasticity (*Peng, Banks-Lee*) 669
Godbey, L. C. Reducing HVI Strength Variability by Sensing Humidity (*Taylor, Brown*) 80
Goldsmid, H. J. Heat Transfer Through Moist Fabrics (*Schneider, Hoschke*) 61
Grasso, Maureen M. Effect of Textile Properties on the Bidirectional Solar-Optical Properties of Shading Fabrics (*Hunn*) 247

Hall, D. M. Mechanism of Yarn Failure (*Broughton, El Mogahzy*) 131

Hamlyn, P. F. A Species-Specific DNA Probe for Goat Fiber Identification (*Nelson, Holden, McCarthy*) 590
Harakawa, K. Bispectrum Evaluation of Combination and Blend Yarns (*Matsumoto, Toriumi, Tsuchiya*) 414
Properties of Double-Core Twin Spun Silk Yarns and Fabrics (*Matsumoto, Toriumi, Tsuchiya*) 710
Hartzell, Mary Michelle Liquid Wetting, Transport, and Retention Properties of Fibrous Assemblies Part II: Water Wetting and Retention of 100% and Blended Woven Fabrics (*Hsieh, Yu*) 697
Hashimoto, Toshimasa Applying Differential Scanning Calorimetry to Detergency Studies of Oily Soil (*Yatagai, Komaki*) 101
Hatch, Kathryn L. *In Vivo* Cutaneous Response to Fabric Part V: Effect of Fiber Type and Fabric Moisture Content on Stratum Corneum Hydration (*Markee, Prato, Zeronian, Maibach, Kuehl, Axelson*) 638
Heinrich, K. New Concepts in *para*-Aramid Fibers (*Jung*) 771
Heirigs, L. T. Properties of Small Diameter Aramid Double Braids: Fatigue Lifetime, Strength Retention after Abrasion, and Strength Modeling (*Schwartz*) 397
Hepworth, K. Comments on "Measuring Beat-Up Force on a Water Jet Loom" 121
Hild, Debra N. Surface Energies of Nonionic Surfactants Adsorbed onto Nylon Fiber and a Correlation with Their Solubility Parameters (*Slade*) 535
Holcombe, B. V. A Two-Stage Sorption Model of the Coupled Diffusion of Moisture and Heat in Wool Fabrics (*Li*) 211
Moisture Buffering Behavior of Hygroscopic Fabric During Wear (*Li, Apcar*) 619
Holden, L. A Species-Specific DNA Probe for Goat Fiber Identification (*Nelson, Hamlyn, McCarthy*) 590
Holt, L. A. Substantivity of Various Anionic Surfactants Applied to Wool Part II: Treatments Under Dyeing Conditions (*Kelson, Reddie*) 140
Hoschke, B. N. Heat Transfer Through Moist Fabrics (*Schneider, Goldsmid*) 61
Hsieh, You-Lo Liquid Wetting, Transport, and Retention Properties of Fibrous Assemblies Part I: Water Wetting Properties of Woven Fabrics and Their Constituent Single Fibers (*Yu*) 677
Part II: Water Wetting and Retention of 100% and Blended Woven Fabrics (*Yu, Hartzell*) 697
Hunn, Bruce D. Effect of Textile Properties on the Bidirectional Solar-Optical Properties of Shading Fabrics (*Grasso*) 247
Hunter, L. Measuring Medullation in Mohair with Near Infrared Reflectance Analysis (*Boguslavsky, Botha*) ... 433
Huson, M. G. The Mechanism by Which Oxidizing Agents Minimize Strength Losses in Wool Dyeing 9
Hwang, Jenn-Yann Properties of Cotton Fabrics Crosslinked with Different Molecular Chain Lengths of Aldehyde Agents Part II: Dyeing Kinetics of Direct Dyes from Finite Baths on Treated Fabrics (*Liang, Ju, Chen*) .. 547

Itoh, Motoyoshi A Model Analysis of the Compressibility of Fiber Assemblies (*Komori, Takaku*) 567

Jacobsen, M. A Psychophysical Evaluation of the Tactile Qualities of Hand Knitting Yarns (*Fritz, Dhingra, Postle*) 557
Johnson, Nigel A. G. Influence of Ageing and Lint Accumulation on the Fastening Strength of Hook and Loop Fasteners (*Taylor, Dowdell*) 766
Ju, Der-Shiann Properties of Cotton Fabrics Crosslinked with Different Molecular Chain Lengths of Aldehyde Agents Part II: Dyeing Kinetics of Direct Dyes from Finite Baths on Treated Fabrics (*Liang, Hwang, Chen*) 547
Jung, H. New Concepts in *para*-Aramid Fibers (*Heinrich*) 771
Jurdana, Lucia E. Penetration of Alcohols into Wool and Hair as Studied by Fluorescence Microscopy (*Leaver*) 463

Kala, Vandana Catalytic Vapor Phase Nitroxidation of *p*-Xylene: A New Route for Synthesis of Terephthalic Acid and Poly(ethylene Terephthalate) (*Prasad, Sharma, Mathew*) 603
Katayama, Akira Degradation of Sulfonated Azo Dyes with Sodium Percarbonate (*Ohura, Takagishi*) 552
Kawase, Tokuzo Effects of Grafting with Acrylic Acid on Removal of Oily Soil from Polyester Fabric (*Uchita, Fujii, Minagawa*) 663
Kelson, J. S. Substantivity of Various Anionic Surfactants Applied to Wool Part II: Treatments Under Dyeing Conditions (*Holt, Reddie*) 140
Kettlewell, R. Fabric-Evoked Prickle (*Naylor, Veitch, Mayfield*) 487
Kim, Young Joo Effects of Added Metal Ions on the Interaction of Wool Keratin Derivatives and an Azo Dye Carrying Hydroxyl Groups (*Kono, Takagishi*) 275
Kimmel, L. B. Comparison of Filament-Core Spun Yarns Produced by New and Conventional Methods (*Sawhney, Ruppenicker, Robert*) 67
Improved Method of Producing a Cotton Covered/Polyester Staple-Core Yarn on a Ring Spinning Frame (*Sawhney, Robert, Ruppenicker*) 21
King, Walter D. Pore Structure of Cotton Fabrics Crosslinked with Formaldehyde-Free Reagents (*Bertoniere*) 349
Komaki, Motoko Applying Differential Scanning Calorimetry to Detergency Studies of Oily Soil (*Yatagai, Hashimoto*) 101
Komori, Takashi A Model Analysis of the Compressibility of Fiber Assemblies (*Itoh, Takaku*) 567
Konda, Fujio Analysis of Blend Irregularity in Yarns Using Image Processing Part I: Fundamental Investigation of Model Yarns (*Watanabe, Kurosaki, Nishimura*) .. 690
Part II: Applying the System to Actual Blended Yarns (*Watanabe, Kurosaki, Nishimura*) 729
Kono, Kenji Effects of Added Metal Ions on the Interaction of Wool Keratin Derivatives and an Azo Dye Carrying Hydroxyl Groups (*Kim, Takagishi*) 275
Kothari, V. K. Air-Jet Texturing of Spun Cotton Yarns for Improved Comfort Part I: Influence of Yarn Structure on Texturability (*Srinivasan, Sengupta*) 40
Part II: Texturability of Carded Spun Yarns Compared to Combed Spun Yarns (*Srinivasan, Sengupta*) 169
Kottes Andrews, B. A. Thermoanalytical Ranking of Catalysts for Use with Polycarboxylic Acids as Durable Press Reactants (*Trask-Morrell*) 144
Kurosaki, Shi-Nya Analysis of Blend Irregularity in Yarns Using Image Processing Part I: Fundamental Investigation of Model Yarns (*Watanabe, Konda, Nishimura*) 690
Part II: Applying the System to Actual Blended Yarns (*Watanabe, Konda, Nishimura*) 729
Kuehl, Robert O. *In Vivo* Cutaneous Response to Fabric Part V: Effect of Fiber Type and Fabric Moisture Content on Stratum Corneum Hydration (*Hatch, Markee, Prato, Zeronian, Maibach, Axelson*) 638

Ladisch, Christine M. A New Approach to the Study of Textile Properties with Liquid Chromatography Comparison of Void Volume and Surface Area of Cotton and Ramie Using a Rolled Fabric Stationary Phase (*Yang, Velayudhan, Ladisch*) 361

A New Approach to the Study of Textile Dyeing Properties with Liquid Chromatography Part I: Direct Dye Adsorption on Cotton Using a Rolled Fabric Stationary Phase (*Yang*) ... 481
Part II: Compatibility of Basic Dyes for Acrylic Fabric (*Yang*) ... 531
Ladisch, M. R. A New Approach to the Study of Textile Properties with Liquid Chromatography Comparison of Void Volume and Surface Area of Cotton and Ramie Using a Rolled Fabric Stationary Phase (*Ladisch, Yang, Velayudhan*) ... 361
Lamb, George E. R. A New Carpet Soiling Test ... 325
Heat and Water Vapor Transport in Fabrics Under Ventilated Conditions ... 387
Leaver, Ian H. Penetration of Alcohols into Wool and Hair as Studied by Fluorescence Microscopy (*Jurdana*) ... 463
Le, Cuong V. Multilayer Adsorption of Moisture in Wool and Its Application in Fabric Steaming (*Ly*) ... 648
Lee, Dae Hoon Compressional Energy of the Random Fiber Assembly Part I: Theory (*Carnaby*) ... 185
Part II: Evaluation (*Carnaby, Tandon*) ... 258
Finite Element Modeling of an Oriented Assembly of Continuous Fibers (*Djaja, Moss, Carr, Carnaby*) ... 445
Leonard, Margaret M. Formation of Iron Sulfides During Wool Scouring and Their Effect on the Color of Scoured Wool (*McLaughlin*) ... 516
Lewis, D. M. Reactions of β-Sulphato-ethylsulphone Crosslinking Agent with Wool Part II: Mechanism from Solubility and Swelling Tests (*Smith, Spedding, Otterburn*) ... 309
Li, Y. A Two-Stage Sorption Model of the Coupled Diffusion of Moisture and Heat in Wool Fabrics (*Holcombe*) ... 211
Moisture Buffering Behavior of Hygroscopic Fabric During Wear (*Holcombe, Apcar*) ... 619
Liang, Tsang-Yuh Properties of Cotton Fabrics Crosslinked with Different Molecular Chain Lengths of Aldehyde Agents Part II: Dyeing Kinetics of Direct Dyes from Finite Baths on Treated Fabrics (*Hwang, Ju, Chen*) 547

SUBJECT INDEX

Abrasion
degradation by sizing process: effect of creep-related overdrying in sizing on warp characteristics and weaving performance *El Mogahzy, Perkins* 317
during high speed spinning: interaction between high speed nylon fibers and unlubricated ceramic textile guides *Ramsey, Page* 715
of small diameter aramid braids: fatigue lifetime, strength retention after abrasion, and strength modeling *Heirigs, Schwartz* 397
single fiber transfer: influence of textile structure in woven fabrics *Annis, Bresee, Cooper* 293
Acrylics
basic dyes on: liquid chromatography study of textile dyeing properties *Yang, Ladisch* 531
water and heat transport through: layered fabrics: effect of chemical nature of fibers *Yasuda, Miyama, Yasuda* 227
Animal Fibers
goat fiber identification: species-specific DNA probe for *Nelson, Hamlyn, Holden, McCarthy* 590
mohair medullation: measuring with a new NIRA method *Boguslavsky, Botha, Hunter* 433
wool/speciality fiber blends: SEM quantitative mixture analysis compared with light microscopy *Wortmann, Wortmann* 423
Aramids
as parachute fabrics: deflection-force measurements and observations on Kevlar 29 *Ericksen, Davis, Warren* 628
***p*-aramid fibers:** new concepts in: discussion of PPTA and HMA *Heinrich, Jung* 771
small diameter aramid braids: fatigue lifetime, strength retention after abrasion, and strength modeling *Heirigs, Schwartz* 397
Armor
fabric-based systems: analysis of system effects in woven fabrics under ballistic impact *Cunniff* 495
Aromatic Fibers
***p*-aramids:** new concepts in: discussion of PPTA and HMA *Heinrich, Jung* 771

Ballistics
fabric-based armor: analysis of system effects in woven fabrics under impact *Cunniff* 495

Bast Fibers
sugar cane cellulose: extraction and evaluation of *Collier, Collier, Agarwal, Lo* 741
Bending
of fiber assemblies: model analysis of compressibility *Komori, Itoh, Takaku* 567
Bleaching
and dyeing of wool: sequential oxidative/reductive bleaching and dyeing in a single bath *Arifoglu, Marmer* 123
and shrinkproofing of wool: optimizing Hercosett/optical brightener agent/hydrogen peroxide on untreated wool *de la Maza, Manich, Parra, de Castellar* 162
oxidative/reductive process: reaction of thiourea with hydrogen peroxide *Arifoglu, Marmer, Dudley* 94
sodium percarbonate: degradation of sulfonated azo dyes with *Ohura, Katayama, Takagishi* 552
Blends
irregularity in yarns: image processing analysis of model yarns *Watanabe, Kurosaki, Konda, Nishimura* 690
irregularity in: image processing analysis: applying system to actual yarns *Watanabe, Kurosaki, Konda, Nishimura* 729

Calorimetry
oily soils study: applying DSC to detergency studies *Yatagai, Komaki, Hashimoto* 101
Carpets
soiling of: new carpet soiling test by laboratory carpet walker *Lamb* 325
texture definition in: evaluating loss of using mathematical morphology *Sobus, Pourdeyhimi, Xu, Ulcay* 26
Cashmere
DNA probe for: species-specific probe for goat fiber identification *Nelson, Hamlyn, Holden, McCarthy* 590
wool/speciality fiber blends: SEM and light microscopy analyses of fiber mixtures compared *Wortmann, Wortmann* 423
Catalysis
in DP treatments of cotton: thermoanalytical ranking of catalysts used with polycarboxylic acids as DP reactants *Trask-Morrell, Kottes Andrews* 144
Cellulose
dye diffusion in: acid dye in multiple porous membrane assembly *Sasaki, Morikawa* 509

from sugar cane: extraction and evaluation of fibers *Collier, Collier, Agarwal, Lo* 741
Chromatography
TLC/FID study of wool: degradative shrinkproofing processes: lipid modification *Coderch, Soriano, Pinazo, Parra, Erra* 704
study of acylics: compatibility of basic dyes for acrylic fabric *Yang, Ladisch* 531
study of cotton: direct dye adsorption using rolled fabric phase *Ladisch, Yang* 481
Clothing, Protective
fabric-based armor: analysis of system effects in woven fabrics under ballistic impact *Cunniff* 495
Cohesion
of fibers in yarns: RotorRing measurement of cohesion and bulk properties of nylon and PET staple fibers *Ghosh, Rodgers, Ortega* 608
Colorfastness
of cationic dyed cotton: mechanical properties of cotton modified with hydrophobic and acidic groups *Fukatsu* 135
Comfort
heat and moisture transfer: in fabrics under ventilated conditions *Lamb* 387
moisture buffering of fabrics: behavior of hygroscopic fabrics during wear: wool versus polyester *Li, Holcombe, Apcar* 619
of air-jet textured cotton yarns: improved comfort: carded spun compared with combed spun yarns *Srinivasan, Sengupta, Kothari* 169
of air-jet textured cotton yarns: influence of yarn structure on texturability *Srinivasan, Sengupta, Kothari* 40
of garments in high humidity: *in vivo* cutaneous response: effect of fiber type and moisture content on stratum corneum hydration *Hatch, Markee, Prato, Zeronian, Maibach, Kuehl, Axelson* 638
of wool knitwear: fabric-evoked prickle *Naylor, Veitch, Mayfield, Kettlewell* 487
Composites
bi-component yarns: improved cotton covered/polyester staple-core yarn on a ring spinning system *Sawhney, Robert, Ruppenicker, Kimmel* 21
silk and cotton yarns: bispectrum evaluation of combination and blend yarns *Matsumoto, Toriumi, Tsuchiya, Harakawa* 414
silk/cotton yarns: double-core twin spun silk/cotton yarns and fabrics *Matsumoto, Toriumi, Tsuchiya, Harakawa* 710
filament-core spun yarns: produced by new and conventional methods *Sawhney, Ruppenicker, Kimmel, Robert* 67
Compression
in a fabric roll: effect of viscoelasticity *Ghosh, Peng, Banks-Lee* 669
of fiber assemblies: model analysis of fiber bending unit *Komori, Itoh, Takaku* 567
of random fiber assembly: evaluation of compressional energy *Lee, Carnaby, Tandon* 258
of random fiber assembly: theory of compressional energy *Lee, Carnaby* 185
Computer Techniques
for handle measurements: physical interpretation of curves from fabric extraction process *Pan, Yen* 279
for optimizing cotton blend costs: HVI fiber properties and linear programming for analysis with respect to quality *El Mogahzy* 1
to analyze cotton blend costs: optimizing quality using HVI fiber properties and linear programming: variability constraints *El Mogahzy* 108
to analyze fiber crimp: image analysis, definitions, algorithms, and techniques *Xu, Pourdeyhimi, Sobus* ... 73
to correlate dyeing data: equilibrium equation for direct dye mixtures on cellulose *Porter* 236
to evaluate carpets: loss of texture definition evaluated using image covariance *Sobus, Pourdeyhimi, Xu, Ulcay* 26
to measure blend irregularity: image processing analysis of model yarns *Watanabe, Kurosaki, Konda, Nishimura* 690
to measure blend irregularity: image processing analysis: applying system to actual yarns *Watanabe, Kurosaki, Konda, Nishimura* 729
Cotton Fabrics
as an abradant fabric: influence of textile structure on single fiber transfer from woven fabrics *Annis, Bresee, Cooper* 293
cationic dyeing of: mechanical properties of cotton modified with hydrophobic and acidic groups *Fukatsu* 135
comfort response to: *in vivo* cutaneous response: effect of fiber type and moisture content on stratum corneum hydration *Hatch, Markee, Prato, Zeronian, Maibach, Kuehl, Axelson* 638
cotton/poly knits: handle of weft knit single and double fabrics for summer and winter *Chen, Barker, Smith, Scruggs* 200
cotton/silk composite yarns: double-core twin spun yarns and fabrics *Matsumoto, Toriumi, Tsuchiya, Harakawa* 710
crosslinked with aldehydes: dyeing kinetics of direct dyes from finite baths on treated fabrics *Liang, Hwang, Ju, Chen* 547
crosslinked with aldehydes: formaldehyde and glutaraldehyde: physical properties and agent distribution *Shyu, Chen* 469
crosslinking of: nonformaldehyde polymerization treatment for improved strength retention *Choi* 614
direct dyes on: liquid chromatography study using rolled fabric phase *Ladisch, Yang* 481
durable press treated: pore structure of fabrics crosslinked with formaldehyde-free reagents *Bertoniere, King* .. 349
durable press treatment of: reacting cellulose with lignin-based polyurethane *Cardamone* 371
frictional properties of: effects of fabric structure *Ajayi* .. 87
frictional properties of: fabric smoothness, friction, and handle *Ajayi* 52
liquid chromatography study: comparison of void volume and surface area of cotton and ramie with rolled fabric phase *Ladisch, Yang, Velayudhan, Ladisch* 361
polycarboxylic acids as DP agents: thermoanalytical ranking of catalysts for use with *Trask-Morrell, Kottes Andrews* 144
polyester/cotton knits: effect of spinning system on pill resistance *Alston* 105
thermal conductivity of: heat transfer through moist fabrics *Schneider, Hoschke, Goldsmid* 61
water and heat transport through: layered fabrics: effect of chemical nature of fibers *Yasuda, Miyama, Yasuda* 227
wettability of: water wetting and retention of 100% and blended woven fabrics *Hsieh, Yu, Hartzell* 697
wettability of: water wetting, transport, and retention of fabrics and single fibers *Hsieh, Yu* 677
Cotton Fibers
direct dyes on: equilibrium equation for dye mixtures on cellulose *Porter* 236
Cotton Yarns
air-jet texturing of: improved comfort, influence of yarn structure *Srinivasan, Sengupta, Kothari* 40
air-jet texturing of: improved comfort: carded spun compared with combed spun yarns *Srinivasan, Sengupta, Kothari* 169
bi-component yarns: improved cotton covered/polyester staple-core yarn on a ring spinning system *Sawhney, Robert, Ruppenicker, Kimmel* 21
composite yarns: comparison of filament-core spun yarns made by new and conventional methods *Sawhney, Ruppenicker, Kimmel, Robert* 67
mechanical properties of: comments on stress-relaxation and tensile modulus of polymeric fibers *Vangheluwe* 306

predicting strength properties: new approach for predicting *Frydrych* 340
silk and cotton composites: bispectrum evaluation of combination and blend yarns *Matsumoto, Toriumi, Tsuchiya, Harakawa* 414
tenacity data from different testers: comparison of data from Uster Tensorapid, Dynamat II, and Scott skein testers *De Luca, Thibodeaux* 175
twist distribution in: twist and linear density coefficient of variation-length curves of poly/cotton yarns from different spinning systems *Manich, de Castellar, Barella* 115

Cotton, Raw
HVI testing of: reducing HVI strength variability by sensing humidity *Taylor, Brown, Godbey* 80
HVI testing system comparison: regressional observations of HVI fiber properties, yarn quality, and processing performance: HVI fiber parameters *El Mogahzy, Broughton* 218
cotton blend costs: optimizing costs and quality using HVI fiber properties and linear programming *El Mogahzy* 1
cotton blend costs: optimizing quality using HVI fiber properties and linear programming: variability constraints *El Mogahzy* 108
effect of fiber friction on processing: importance of friction and torsional and bending rigidities in sliver, roving, and yarn *De Luca, Thibodeaux* 192
lint cleaning: effect on seed-coat fragment size distribution *Mangialardi* 335
never-dried cotton cellulose: effect of alkali treatment on enzymolysis *Bhatawdekar, Sreenivasan, Balasubramanya, Paralikar* 290

Creep
creep-related overdrying: effect of overdried sizing on warp characteristics and weaving performance *El Mogahzy, Perkins* 317

Crimp
characterized by image analysis: definitions, algorithms, and techniques *Xu, Pourdeyhimi, Sobus* 73
in dyed wool: mechanism by which oxidizing agents minimize strength losses in wool dyeing *Huson* 9
of FFT partially oriented nylon: polymer modifications for improved texture *Southern, Nunning, Miller* 437
of cotton yarns: effects of fabric structure on frictional properties *Ajayi* 87

Crosslinking
nonformaldehyde treatment: polmerization-crosslinker for improved cotton strength retention *Choi* 614
with aldehyde agents: formaldehyde and glutaraldehyde: physical properties and agent distribution *Shyu, Chen* 469

Crosslinking Agents
for wool fabrics: reactions of XLC: mechanism from solubility and swelling tests *Smith, Spedding, Otterburn, Lewis* 309
formaldehyde-free reagents: pore structure of cottons crosslinked with *Bertoniere, King* 349

Crystallinity
of PET and nylon: effect of plasma etching and dyeability characteristics *Okuno, Yasuda, Yasuda* 474
of high speed spun polyester: structural morphology: TEM and DSC studies *Mukhopadhyay, Bebbington, Foster* 403

DNA
to identify goat fibers: species-specific DNA probe for *Nelson, Hamlyn, Holden, McCarthy* 590

Deformation
in roll-making operation: effect of viscoelasticity *Ghosh, Peng, Banks-Lee* 669
mechanics of staple yarns: constitutive theory for short fiber yarns: mechanics without slippage effect *Pan* 749

Detergency
oily soils study: applying DSC to *Yatagai, Komaki, Hashimoto* 101

Diffusion
of PVA fibers in water: molecular model of polymer fiber behavior in active media under load *Darinsky, Lyulin, Vaykhansky, Chereisky, Dobrovolskaya* 392
of heat and moisture in wool fabrics: two-stage sorption model of coupled diffusion *Li, Holcombe* 211
of nonionic dye on nylon: dyeing rate of nylon 6 with *p*-aminoazobenzene *Sasaki, Morikawa, Miyaguchi, Araki* 657
of nonionic dye on nylon: fabric and yarn assemblies with *p*-aminoazobenzene *Sasaki, Morikawa, Araki* 736

Dimensional Properties
of woven wool fabrics: relationship between hygral expansion, relaxation shrinkage, and extensibility *Cookson* 44

Durable Press
aldehyde agents: dyeing kinetics of direct dyes from finite baths on treated cottons *Liang, Hwang, Ju, Chen* .. 547
aldehyde treatments of cotton: physical properties and agent distribution *Shyu, Chen* 469
formaldehyde-free reagents: pore structure of cottons crossliked with *Bertoniere, King* 349
nonformaldehyde treatment: polymerization-crosslinker for improved cotton strength retention *Choi* 614
polycarboxylic acid as agents: thermoanalytical ranking of catalysts for use with *Trask-Morrell, Kottes Andrews* 144

Dyeing
and bleaching of wool: sequential oxidative/reductive bleaching and dyeing in a single bath *Arifoglu, Marmer* 123
direct dyes on cotton: liquid chromatography study of adsorption using rolled fabric phase *Ladisch, Yang* .. 481
dyeing rate of nylon: fabric and yarn assemblies with *p*-aminoazobenzene *Sasaki, Morikawa, Araki* 736
kinetics of: cottons crosslinked with aldehyde agents: direct dyes from finite baths on treated fabrics *Liang, Hwang, Ju, Chen* 547
of PET POY: effect of heat-setting temperature on hydrazine treatment for enhanced dyeability *Niu, Wakida, Ueda* 575
of PET and nylon: effect of crystallinity on plasma etching and dyeability *Okuno, Yasuda, Yasuda* 474
of acrylic fabric: liquid chromatography study of textile dyeing properties *Yang, Ladisch* 531
of modified cotton fibers: mechanical properties of cotton modified for cationic dyes with hydrophobic and acidic groups *Fukatsu* 135
of nylon 6: dyeing rate of yarn with nonionic *p*-aminoazoenzene *Sasaki, Morikawa, Miyaguchi, Araki* ... 657
of surfactant treated wool: substantivity of various anionic surfactants subjected to dyeing conditions *Holt, Kelson, Reddie* 140
of wool fabrics: mechanism by which oxidizing agents minimize strength losses *Huson* 9
of wool fibers: effects of processing on bound and free fatty acids *Negri, Cornell, Rivett* 381
of wool with liposomes: stability of systems and application on untreated wool *de la Maza, Parra, Bosch, Coderch* 406

Dyes
acid dye diffusion: in multiple porous membrane assembly *Sasaki, Morikawa* 509
azo dyes on wool: effects of added metal ions on interaction of wool keratin derivatives and azo dye carrying hydroxyl groups *Kim, Kono, Takagishi* 275
diffusion technique for wool and hair: fluorescence microscopy study of alcohol penetration into wool and hair *Jurdana, Leaver* 463
direct dyes on cellulose: equilibrium equation for mixtures *Porter* 236

disperse dyes: photolytic behavior of azo pyridone dyes on polyester substrates *Wang, Wang* 15
sulfonated azo dyes: degradation with sodium percarbonate *Ohura, Katayama, Takagishi* 552

Elasticity
in roll-making operation: analysis of fabric deformation: effect of viscoelasticity *Ghosh, Peng, Banks-Lee* ... 669
of polyester staple fiber yarns: elastic recovery and inverse relaxation of rotor spun yarns *Manich, de Castellar* 196
Energy
bending energy: random fiber assembly: theory of compressional energy *Lee, Carnaby* 185
bending energy: of random fiber assembly: evaluation *Lee, Carnaby, Tandon* 258
Environmental Impacts
of wool bleaching and dyeing: sequential oxidative/reductive bleaching and dyeing in a single bath *Arifoglu, Marmer* 123
Enzymes
enzymolysis of cotton: effect of alkali treatment on never-dried cellulose *Bhatawdekar, Sreenivasan, Balasubramanya, Paralikar* 290

Fading
of dyes on polyester: photolytic behavior of azo pyridone disperse dyes *Wang, Wang* 15
Fasteners
hook and loop: effect of ageing and lint accumulation on fastening strength *Taylor, Johnson, Dowdell* 766
Fatigue
of small diameter aramid braids: fatigue lifetime, strength retention after abrasion, and strength modeling *Heirigs, Schwartz* 397
Felting
of cuff edges: effects of Synthappret BAP-based treatments on felting and mechanical properties of lightweight wool *Cookson, De Boos* 595
Fiber Failure
of polymeric fibers: behavior of fibers in active media under load: dynamic gel *Vaykhansky, Frenkel, Chereisky, Dobrovolskaya* 356
Fiber Properties
polymer fiber behavior: molecular model for fibers in active media under load *Darinsky, Lyulin, Vaykhansky, Chereisky, Dobrovolskaya* 392
Fluid Flow
in fibrous networks: spatial distribution of local permeabilities in *Montgomery, Miller, Rebenfeld* 151
Fluorescence
microscopy: to study penetration of alcohols into wool and hair *Jurdana, Leaver* 463
Formaldehyde
cotton crosslinking agent: also glutaraldehyde: dyeing kinetics of direct dyes from finite baths on treated cottons *Liang, Hwang, Ju, Chen* 547
cotton crosslinking agent: also glutaraldehyde: physical properties and agent distribution *Shyu, Chen* 469
durable press cottons: reacting cellulose with lignin-based polyurethane *Cardamone* 371
durable press reagents: pore structure of cotton fabrics crosslinked with formaldehyde-free reagents *Bertoniere, King* 349
nonformaldehyde agent: polymerization-crosslinking treatment of cottons for improved strength retention *Choi* 614
Friction
cotton fiber friction: effect on processing: importance of friction and torsional and bending rigidities in sliver, roving, and yarns *De Luca, Thibodeaux* 192
in high speed spinning: interaction between nylon fibers and unlubricated ceramic textile guides *Ramsey, Page* 715
in wools and cottons: fabric smoothness, friction, and handle *Ajayi* 52
interfiber friction: mechanism of polyester yarn failure *Broughton, El Mogahzy, Hall* 131
of cotton fabrics: effects of fabric structure *Ajayi* 87

Geometry
of a fibrous assembly: finite element modeling of an oriented assembly of continuous fibers *Djaja, Moss, Carr, Carnaby, Lee* 445
of ballistic impact: analysis of fabric-based armor systems under ballistic impact *Cunniff* 495
of fiber assemblies: model analysis of compressibility *Komori, Itoh, Takaku* 567
of filling patterning: replicate color: maximum increase in minimax magazine movement on the loom *Dawson* 522
of parachute fabrics: deflection-force measurements and observations on Kevlar 29 *Ericksen, Davis, Warren* 628
of random fiber assembly: evaluation of compressional energy *Lee, Carnaby, Tandon* 258
of random fiber assembly: theory of compressional energy *Lee, Carnaby* 185
to measure handle: physical interpretation of curves from fabric extraction process *Pan, Yen* 279
Geotextiles
fluid flow in: spatial distribution of local permeabilities in fibrous networks *Montgomery, Miller, Rebenfeld* .. 151
Ginning
lint cleaning at the gin: effect on seed-coat fragment size distribution in cotton *Mangialardi* 335
Grafting
of polyester: effects of acrylic acid grafting on oily soil removal *Kawase, Uchita, Fujii, Minigawa* 663

Hair
alcohol penetration of: also wool: fluorescence microscopy study *Jurdana, Leaver* 463
Hairiness
of yarns: process of winding *Rust, Peykamian* 685
Handle
measurement of: physical interpretation of curves from fabric extraction process *Pan, Yen* 279
of cottons and wools: fabric smoothness, friction, and handle *Ajayi* 52
of knitting yarns: psychophysical evaluation of tactile qualities *Jacobsen, Fritz, Dhingra, Postle* 557
of weft knit fabrics: cotton/poly single and double knits for summer and winter *Chen, Barker, Smith, Scruggs* 200
Heat Setting
of PET POY: effect of temperature on hydrazine treatment *Niu, Wakida, Ueda* 575
Heat Transfer
comfort studies: heat and water vapor transfer in fabrics under ventilated conditions *Lamb* 387
in wool fabrics: two-stage sorption model of coupled moisture and heat diffusion *Li, Holcombe* 211
through layered fabrics: dynamic water vapor and heat transport: effect of chemical nature of fibers *Yasuda, Miyama, Yasuda* 227
High Volume Instruments
comparison of various systems: regressional observations of HVI fiber properties, yarn quality, and processing performance: HVI fiber parameters *El Mogahzy, Broughton* 218
effect of humidity: reducing HVI strength variability by sensing humidity *Taylor, Brown, Godbey* 80

to analyze cotton blend costs: optimizing costs and quality using HVI fiber properties and linear programming *El Mogahzy* 1
to analyze cotton blend costs: optimizing quality using HVI fiber properties and linear programming: variability constraints *El Mogahzy* 108
Humidity
in HVI cotton testing: reducing HVI strength variability by sensing humidity *Taylor, Brown, Godbey* 80

Image Analysis
of fiber crimp: definitions, algorithms, and techniques *Xu, Pourdeyhimi, Sobus* 73
of textured carpets: evaluating loss of texture definition using image covariance *Sobus, Pourdeyhimi, Xu, Ulcay* 26
of yarn blend irregularity: applying system to actual blended wool yarns *Watanabe, Kurosaki, Konda, Nishimura* 729
of yarn blends: blend irregularity investigation of model yarns *Watanabe, Kurosaki, Konda, Nishimura* 690

Jute
adhesive bonded nonwovens: tensile behavior *Sengupta, Sinha, Samajpati, Bag* 457

Keratin
alcohol penetration of: fluorescence microscopy study of wool, hair, and animal fibers *Jurdana, Leaver* 463
azo dyes on keratin derivatives: effects of added metal ions on interaction of wool keratin derivatives and azo dye carrying hydroxyl groups *Kim, Kono, Takagishi* ... 275
Knits
as shading fabrics: effect of textile properties on solar-optical properties: comparison with woven fabrics *Grasso, Hunn* 247
handle of weft knits: cotton/poly single and double knits for summer and winter *Chen, Barker, Smith, Scruggs* 200
wool knitwear: fabric-evoked prickle *Naylor, Veitch, Mayfield, Kettlewell* 487
Knitting
hand knitting yarns: phychophysical evaluation of tactile qualities *Jacobsen, Fritz, Dhingra, Postle* 557

Laundering
of polyester: effects of acrylic acid grafting on oily soil removal from polyester fabric *Kawase, Uchita, Fujii, Minagawa* 663
oily soil removal: applying DSC to detergency studies *Yatagai, Komaki, Hashimoto* 101
Light Microscopy
for fiber identification: compared with SEM for analyzing wool/speciality fiber blends *Wortmann, Wortmann* 423
Lightfastness
of dyed polyester: photolytic behavior of azo pyridone disperse dyes *Wang, Wang* 15
Lint
cotton lint cleaning: effect on seed-coat fragment size distribution *Mangialardi* 335
on hook and loop fasteners: effect of ageing and lint accumulation on fastening strength *Taylor, Johnson, Dowdell* 766
Lipids
dye-liposome systems for wool: stability of systems and application on untreated wool *de la Maza, Parra, Bosch, Coderch* 406
in wool yellowing: effect of external lipids on process *Wojciechowska, Pielesz, Włochowicz* 580
modification by shrinkproofing: degradative processes in wool: TLC/FID study *Coderch, Soriano, Pinazo, Parra, Erra* 704
Liposomes
for wool dyeing: large unilamellar vesicle liposomes: stability of systems and application on untreated wool *de la Maza, Parra, Bosch, Coderch* 406
Liquid Chromatography
to study textile properties: new approach: comparison of void volume and surface area of cotton and ramie with rolled fabric phase *Ladisch, Yang, Velayudhan, Ladisch* 361
Looms
filling patterning on: replicate color: maximum increase in minimax magazine movement *Dawson* 522
water jet loom: comments on measuring beat-up force *Hepworth* 121

Mathematical Analysis
of acid dye diffusion: in multiple porous membrane assembly *Sasaki, Morikawa* 509
of compressional energy: evaluation of random fiber assembly *Lee, Carnaby, Tandon* 258
of compressional energy: random fiber assembly: theory *Lee, Carnaby* 185
of continuous fiber assembly: finite element modeling of an oriented assembly of continuous fibers *Djaja, Moss, Carr, Carnaby, Lee* 445
of cotton blend costs: optimizing costs and quality using HVI fiber properties and linear programming *El Mogahzy* 1
of cotton blend costs: optimizing quality using HVI fiber properties and linear programming: variability constraints *El Mogahzy* 108
of cotton tensile data: comparison of yarn tenacity data from Uster Tensorapid, Dyanmat II, and Scott skein testers *De Luca, Thibodeaux* 175
of diffusion in wool fabrics: two-stage sorption model of coupled moisture and heat diffusion *Li, Holcombe* 211
of direct dyes on cotton: equilibrium equation for dye mixtures on cellulose *Porter* 236
of dye diffusion: dyeing rate of nylon 6 yarn with *p*-aminoazobenzene *Sasaki, Morikawa, Miyaguchi, Araki* 657
of fiber assemblies: model analysis of compressibility *Komori, Itoh, Takaku* 567
of grafted polyester: surface free energies: effects of acrylic acid grafting on oily soil removal *Kawase, Uchita, Fujii, Minagawa* 663
of handle measurements: physical interpretation of curves from fabric extraction process *Pan, Yen* 279
of HVI testing systems: regressional observations of HVI fiber properties, yarn quality, and processing performance: HVI fiber parameters *El Mogahzy, Broughton* 218
of parachute fabrics: deflection-force measurements and observations on Kevlar 29 *Ericksen, Davis, Warren* 628
of roll-making operation: effect of viscoelasticity *Ghosh, Peng, Banks-Lee* 669
of staple fiber mechanics: constitutive theory for short fiber yarns: mechanics of staple yarn without slippage effect *Pan* 749
of textile processing: using off-line quality engineering: concepts and theories *El Mogahzy* 266
of textured carpets: evaluating loss of texture definition using image covariance *Sobus, Pourdeyhimi, Xu, Ulcay* 26
of wool adsorption: multilayer adsorption of moisture in wool fibers and application to fabric steaming *Le, Ly* 648
of yarn strength: new approach for predicting strength of cotton yarns *Frydrych* 340

Mechanical Properties
of PVA fibers in water: molecular model for polymer fiber behavior in active media under load *Darinsky, Lyulin, Vaykhansky, Chereisky, Dobrovolskaya* 392
of cationic dyed cotton: modified with hydrophobic and acidic groups *Fukatsu* 135
of hand knitting yarns: phychophysical evaluation of tactile qualities *Jacobsen, Fritz, Dhingra, Postle* 557
of jute nonwovens: tensile behavior of adhesive bonded jute *Sengupta, Sinha, Samajpati, Bag* 457
of parachute fabrics: deflection-force measurements and observations on Kevlar 29 *Ericksen, Davis, Warren* 628
of polymeric fibers: behavior of fibers in active media under load: dynamic gel *Vaykhansky, Frenkel, Chereisky, Dobrovolskaya* 356
Mechanics
micromechanical yarn model: finite element modeling of an oriented assembly of continuous fibers *Djaja, Moss, Carr, Carnaby, Lee* 445
of staple fiber yarn: constitutive theory for short fiber yarns: mechanics of staple yarn without slippage effect *Pan* 749
Medullation
in mohair: measuring with NIRA method *Boguslavsky, Botha, Hunter* 433
Mohair
DNA probe for: species-specific probe for goat fiber identification *Nelson, Hamlyn, Holden, McCarthy* 590
measuring medullation in: near infrared reflectance analysis *Boguslavsky, Botha, Hunter* 433
wool/speciality fiber blends: SEM and light microscopy analyses of fiber mixtures compared *Wortmann, Wortmann* 423
Moisture Regain
in wool fibers: multilayer adsorption of moisture and application to fabric steaming *Le, Ly* 648
Moisture Transfer
comfort studies: heat and water vapor transport in fabrics under ventilated conditions *Lamb* 387
in fibrous assemblies: water wetting and retention of 100% and blended woven fabrics *Hsieh, Yu, Hartzell* 697
in fibrous assemblies: water wetting, transport, and retention of fabrics and single fibers *Hsieh, Yu* 677
in wool fabrics: two-stage sorption model of coupled moisture and heat diffusion *Li, Holcombe* 211
of wool fabrics: water vapor buffering behavior of hygroscopic fabric during wear *Li, Holcombe, Apcar* 619

Nonwovens
adhesive bonded jute: tensile behavior *Sengupta, Sinha, Samajpati, Bag* 457
Nuclear Magnetic Resonance
studies of bleaching process: oxidative/reductive bleaching, reaction of thiourea with hydrogen peroxide *Arifoglu, Marmer, Dudley* 94
Nylon
composite yarns: comparison of filament-core spun yarns made by new and conventional methods *Sawhney, Ruppenicker, Kimmel, Robert* 67
dyeing rate of: dyeing with nonionic *p*-aminoazobenzene *Sasaki, Morikawa, Miyaguchi, Araki* 657
dyeing rate of: fabric and yarn assemblies with *p*-aminoazobenzene *Sasaki, Morikawa, Araki* 736
fiber crimp in: image analysis, definitions, algorithms, and techniques *Xu, Pourdeyhimi, Sobus* 73
melt spinning of: interaction between high speed fibers and unlubricated ceramic textile guides *Ramsey, Page* 715
nonionic surfactants on: surface energies of surfactants and correlation with solubility parameters *Slade, Hild* 535
plasma etching of: effect of crystallinity of PET and nylon on etching and dyeability *Okuno, Yasuda, Yasuda* 474
staple fibers: RotorRing measurement of fiber cohesion and bulk properties *Ghosh, Rodgers, Ortega* 608
textured nylon 66: polymer modifications for improved texture *Southern, Nunning, Miller* 437
wettability of: water wetting and retention of 100% and blended woven fabrics *Hsieh, Yu, Hartzell* 697
wettability of: water wetting, transport, and retention of fabrics and single fibers *Hsieh, Yu* 677

Optical Brighteners
on untreated wool: optimizing Hercosett/optical brightener agent/hydrogen peroxide for shrinkproofing *de la Maza, Manich, Parra, de Castellar* 162
Optical Phenomena
shading fabrics: effect of textile properties on bidirectional solar-optical properties *Grasso, Hunn* 247
Oxidation
of *p*-xylene: catalytic vapor phase nitroxidation to synthesize terephthalic acid and PET *Kala, Prasad, Sharma, Mathew* 603

Permeability
of fibrous networks: spatial distribution of local permeabilities in *Montgomery, Miller, Rebenfeld* 151
Pilling
of cotton/polyester knits: effect of yarn spinning system on pill resistance *Alston* 105
Plasma
etching of PET and nylon: effect of crystallinity on etching and dyeability *Okuno, Yasuda, Yasuda* 474
Polyamides
p-aramid fibers: new concepts: discussion of PPTA and HMA *Heinrich, Jung* 771
Polyester
abrasion of cotton/poly blend: influence of textile structure on single fiber transfer from woven fabrics *Annis, Bresee, Cooper* 293
acrylic acid grafted: effects of grafting on oily soil removal from fabrics *Kawase, Uchita, Fujii, Minagawa* 663
air-jet texturing of: Sirospun polyester and rayon blend *Sengupta, Chattopadhyay, Sensarma* 328
bi-component yarns: improved cotton covered/polyester staple-core yarn on a ring spinning system *Sawhney, Robert, Ruppenicker, Kimmel* 21
comfort response to: *in vivo* cutaneous response: effect of fiber type and moisture content on stratum corneum hydration *Hatch, Markee, Prato, Zeronian, Maibach, Kuehl, Axelson* 638
cotton/poly knits: handle of weft knit single and double fabrics for summer and winter *Chen, Barker, Smith, Scruggs* 200
disperse dyes on: photolytic behavior of azo pyridone dyes on polyester substrates *Wang, Wang* 15
geotextile nonwoven: spatial distribution of local permeabilities in fibrous networks *Montgomery, Miller, Rebenfeld* 151
high speed spun fibers: structural morphology of: TEM and DSC study *Mukhopadhyay, Bebbington, Foster* 403
moisture buffering of: water vapor buffering behavior of hygroscopic fabric during wear *Li, Holcombe, Apcar* 619
partially oriented yarn: effect of heat-setting temperature on hydrazine treatment *Niu, Wakida, Ueda* 575
plasma etching of: effect of crystallinity of PET and nylon on etching and dyeability *Okuno, Yasuda, Yasuda* .. 474
polyester/cotton knits: effect of spinning system on pill resistance *Alston* 105
rotor spun yarns: elastic recovery and inverse relaxation of staple fiber yarns *Manich, de Castellar* 196

staple fibers: RotorRing measurement of fiber cohesion and bulk properties *Ghosh, Rodgers, Ortega* 608
synthesized with terephthalic acid: catalytic vapor phase nitroxidation of *p*-xylene *Kala, Prasad, Sharma, Mathew* 603
twist distribution in: twist and linear density coefficient of variation-length curves of poly/cotton yarns from different spinning systems *Manich, de Castellar, Barella* 115
water and heat transport through: layered fabrics: effect of chemical nature of fibers *Yasuda, Miyama, Yasuda* 227
wettability of: water wetting and retention of 100% and blended woven fabrics *Hsieh, Yu, Hartzell* 697
wettability of: water wetting, transport, and retention of fabrics and single fibers *Hsieh, Yu* 677
yarn strength: mechanism of yarn failure: importance of interfiber friction *Broughton, El Mogahzy, Hall* ... 131

Polymeric Fibers
rapid fiber failure: behavior of fibers in active media under load: dynamic gel structure *Vaykhansky, Frenkel, Chereisky, Dobrovolskaya* 356

Polymers
as shrinkproofing agents: effects of Synthappret BAP-based treatments on cuff-edge felting and mechanical properties of lightweight wool *Cookson, De Boos* 595

Polypropylene
geotextile nonwoven: spatial distribution of local permeabilities in fibrous networks *Montgomery, Miller, Rebenfeld* 151
thermal conductivity of: heat transfer through moist fabrics *Schneider, Hoschke, Goldsmid* 61

Polyurethane
as a DP agent: reacting cotton cellulose with lignin-based polyurethane *Cardamone* 371

Polyvinyl Alcohol
fiber behavior: molecular model for fibers in active media under load *Darinsky, Lyulin, Vaykhansky, Chereisky, Dobrovolskaya* 392

Porosity
liquid chromatography study: comparison of void volume and surface area of cotton and ramie with rolled fabric phase *Ladisch, Yang, Velayudhan, Ladisch* 361
of cellulosic membrane: acid dye diffusion in multiple porous membrane assembly *Sasaki, Morikawa* 509

Prickle
fabric-evoked: perceived comfort of wool knitwear *Naylor, Veitch, Mayfield, Kettlewell* 487

Proteins
modification in wool: degradative shrinkproofing processes *Coderch, Pinazo, Erra* 302

Quality Control
off-line quality engineering: concepts and theories in textile processing *El Mogahzy* 266

Ramie
liquid chromatography study of: comparison of void volume and surface area of cotton and ramie with rolled fabric phase *Ladisch, Yang, Velayudhan, Ladisch* 361

Rayon
air-jet textured: Sirospun polyester and rayon blend *Sengupta, Chattopadhyay, Sensarma* 328
wettability of: water wetting and retention of 100% and blended woven fabrics *Hsieh, Yu, Hartzell* 697
wettability of: water wetting, transport, and retention of fabrics and single fibers *Hsieh, Yu* 677

Reflectance
NIRA of mohair: measuring medullation with a new method *Boguslavsky, Botha, Hunter* 433
of shading fabrics: effect of textile properties on bidirectional solar-optical properties *Grasso, Hunn* 247

Relaxation
of polyester staple fiber yarns: elastic recovery and inverse relaxation of rotor spun yarns *Manich, de Castellar* 196
of wool fabrics relationship between hygral expansion, relaxation shrinkage, and extensbility *Cookson* 44

Resins
as DP agents: reacting cotton cellulose with lignin-based polyurethane *Cardamone* 371

Rope
small diameter aramid braids: fatigue lifetime, strength retention after abrasion, and strength modeling *Heirigs, Schwartz* 397

Scouring
and iron sulfide formation: effect on color of scoured wool *McLaughlin, Leonard* 516
of wool fibers: effects of processing on bound and free fatty acids *Negri, Cornell, Rivett* 381

Shading Fabrics
solar-optical properties: effect of textile properties on bidirectional properties *Grasso, Hunn* 247

Shear Stress
of hook and loop fasteners: effect of ageing and lint accumulation on fastening strength *Taylor, Johnson, Dowdell* 766

Shrinkage
of wool fabrics: relationship between hygral expansion, relaxation shrinkage, and extensibility *Cookson* 44

Shrinkproofing
and whitening of wool: optimizing Hercosett/optical brightener agent/hydrogen peroxide on untreated wool *de la Maza, Manich, Parra, de Castellar* 162
cuff-edge felting: effects of Synthappret BAP-based treatments on felting and mechanical properties of lightweight wool *Cookson, De Boos* 595
of wool fabrics: degradative processes: lipid modification *Coderch, Soriano, Pinazo, Parra, Erra* 704
of wool fibers: effects of processing on bound and free fatty acids *Negri, Cornell, Rivett* 381
protein modification with: degradative wool shrinkproofing processes *Coderch, Pinazo, Erra* 302

Silk
composite yarns: double-core twin spun silk and cotton yarns and fabrics *Matsumoto, Toriumi, Tsuchiya, Harakawa* 710
cotton and silk blend yarns: bispectrum evaluation of combination and blend yarns *Matsumoto, Toriumi, Tsuchiya, Harakawa* 414

Sizing
overdrying of warp sheet: effect of creep-related overdrying on warp characteristics and weaving performance *El Mogahzy, Perkins* 317

Sliver
effect of fiber properties on processing: importance of friction and torsional and bending rigidities in cotton sliver, roving, and yarn *De Luca, Thibodeaux* 192
micromechanical yarn model: finite element modeling of an oriented assembly of continuous fibers *Djaja, Moss, Carr, Carnaby, Lee* 445

Soil Removal
from grafted polyester: effects of acrylic acid grafting on oily soil removal from fabric *Kawase, Uchita, Fujii, Minagawa* 663
oily soils: applying DSC to detergency studies *Yatagai, Komaki, Hashimoto* 101
scoured wool discoloring: formation of iron sulfides during scouring and effect on wool color *McLaughlin, Leonard* 516

Soiling
of carpets: new carpet soiling test by laboratory carpet walker *Lamb* ... 325
Solubility
and surface energies: of nonionic surfactants adsorbed onto nylon and correlation with solubility parameters *Slade, Hild* ... 535
of crosslinked wool: reactions of XLC: mechanism from solubility and swelling tests *Smith, Spedding, Otterburn, Lewis* ... 309
Solvents
penetrating wool and hair: fluorescence microscopy study *Jurdana, Leaver* ... 463
Spectroscopy
nuclear magnetic resonance: studies of oxidative/reductive bleaching process *Arifoglu, Marmer, Dudley* ... 94
Spectrum Analysis
of cotton and silk composite yarns: bispectrum evaluation of combination and blend yarns *Matsumoto, Toriumi, Tsuchiya, Harakawa* ... 414
Spinning
effect of system on pilling: pill resistance of polyester/cotton knits *Alston* ... 105
high speed spun polyester: structural morphology of: TEM and DSC studies *Mukhopadhyay, Bebbington, Foster* 403
melt spinning of nylon: interaction between high speed fibers and unlubricated ceramic textile guides *Ramsey, Page* 715
modified ring spinning frame: improved cotton covered/polyester staple-core yarn production *Sawhney, Robert, Ruppenicker, Kimmel* ... 21
of composite yarns: comparison of filament-core spun yarns made by new and conventional methods *Sawhney, Ruppenicker, Kimmel, Robert* ... 67
of *p*-aramid fibers: direct spinning of reaction dope: discussion of PPTA and HMA *Heinrich, Jung* ... 771
of partially oriented nylon: polymer modifications for improved texture *Southern, Nunning, Miller* ... 437
polyester rotor spun yarns: elastic recovery and inverse relaxation of staple fiber yarns *Manich, de Castellar* 196
ring and rotor yarns: influence of strain rate and yarn number on tensile tests *Vangheluwe* ... 586
twin spinning: double-core twin spun silk/cotton yarns and fabrics *Matsumoto, Toriumi, Tsuchiya, Harakawa* 710
spun silk system: bispectrum evaluation of cotton and silk combination and blend yarns *Matsumoto, Toriumi, Tsuchiya, Harakawa* ... 414
yarn unevenness: twist and linear density coefficient of variation-length curves of poly/cotton yarns from different spinning systems *Manich, de Castellar, Barella* 115
Statistical Methods
HVI testing system comparison: regressional observations of HVI fiber properties, yarn quality, and processing performance: HVI fiber parameters *El Mogahzy, Broughton* ... 218
for quality control: using off-line quality engineering in textile processing: concepts and theories *El Mogahzy* 266
to evaluate abrasion: influence of textile structure on single fiber transfer from woven fabrics *Annis, Bresee, Cooper* 293
Steaming
of wool fabrics: multilayer adsorption of moisture in wool fibers and application to fabric steaming *Le, Ly* ... 648
Strain
in a continuous fiber assembly: finite element modeling of an oriented assembly of continuous fibers *Djaja, Moss, Carr, Carnaby, Lee* ... 445
of ballistic impact: analysis of system effects in woven fabric armor under impact *Cunniff* ... 495
of yarns: influence of strain rate and yarn number on tensile tests *Vangheluwe* ... 586
Stress-Relaxation
of polymeric fibers: and tensile modulus: comments on *Vangheluwe* ... 306
Sugar Cane
fibers from: extraction and evaluation of *Collier, Collier, Agarwal, Lo* ... 741
Surfactants
anionic surfactants on wool: substantivity when subjected to dyeing conditions *Holt, Kelson, Reddie* ... 140
nonionic: surface energies of surfactants on nylon fiber and correlation with solubility *Slade, Hild* ... 535

Tenacity
of cotton yarns: new approach for predicting strength properties *Frydrych* ... 340
Tensile Properties
mechanism of yarn failure: interfiber friction of polyester yarns *Broughton, El Mogahzy, Hall* ... 131
of cotton yarns: comparison of data from Uster Tensorapid, Dynamat II, and Scott skein testers *De Luca, Thibodeaux* ... 175
of dyed wool: mechanism by which oxidizing agents minimize strength losses in wool dyeing *Huson* ... 9
of polymeric fibers: and stress-relaxation: comments on *Vangheluwe* ... 306
of yarns: influence of strain rate and yarn number on tensile tests *Vangheluwe* ... 586
Texturing
air-jet texturing of cotton yarns: improved comfort: carded spun compared with combed spun yarns *Srinivasan, Sengupta, Kothari* ... 169
air-jet texturing: of Sirospun yarn: effects of twist, overfeed, and air pressure *Sengupta, Chattopadhyay, Sensarma* 328
of partially oriented nylon: polymer modifications for improved texture *Southern, Nunning, Miller* ... 437
of spun cotton yarns: improved comfort with air-jet texturing *Srinivasan, Sengupta, Kothari* ... 40
Thermal Analysis
comfort response to fabrics: *in vivo* cutaneous response: effect of fiber type and moisture content on stratum corneum hydration *Hatch, Markee, Prato, Zeronian, Maibach, Kuehl, Axelson* ... 638
of DP catalysts: ranking of catalysts used with polycarboxylic acids as DP reactants *Trask-Morrell, Kottes Andrews* ... 144
Thermal Conductivity
through moist fabrics: heat transfer through wool, polypropylene, acrylic, and cotton *Schneider, Hoschke, Goldsmid* ... 61
Torsional Properties
effect on processing: importance of friction and torsional and bending rigidities in cotton sliver, roving, and yarn *De Luca, Thibodeaux* ... 192
Twist
FFT partially oriented nylon: polymer modifications for improved texture *Southern, Nunning, Miller* ... 437
effect on texturing: air-jet texturing of Sirospun yarn *Sengupta, Chattopadhyay, Sensarma* ... 328
twist unevenness distribution: and linear density coefficient of variation length curves of poly/cotton yarns from different spinning systems *Manich, de Castellar, Barella* ... 115

Water Vapor Transfer
through layered fabrics: dynamic water vapor and heat transport: effect of chemical nature of fibers *Yasuda, Miyama, Yasuda* ... 227

Weaving
effect of overdrying: creep-related overdrying in sizing on warp characteristics and weaving performance *El Mogahzy, Perkins* ... 317
filling patterning: replicate color: maximum increase in minimax magazine movement *Dawson* ... 522
water jet loom: comments on measuring beat-up force *Hepworth* ... 121
Wettability
of fibrous asemblies: water wetting, transport, and retention of fabrics and single fibers *Hsieh, Yu* ... 677
of fibrous assemblies: water wetting and retention of 100% and blended woven fabrics *Hsieh, Yu, Hartzell* ... 697
Whiteness
of shrinkproofed wool: degradative shrinkproofing processes: protein modification *Coderch, Pinazo, Erra* 302
Winding
causing yarn hairiness: mechanism of fiber transfer *Rust, Peykamian* ... 685
Wool Fabrics
bleaching and dyeing: sequential oxidative/reductive bleaching and dyeing in a single bath *Arifoglu, Marmer* 123
crosslinking agents for: reactions of XLC: mechanism from solubility and swelling tests *Smith, Spedding, Otterburn, Lewis* ... 309
cuff-edge felting of: effect of Synthappret BAP-based treatments on felting and mechanical properties *Cookson, De Boos* ... 595
dyeing of: mechanism by which oxidizing agents minimize strength losses *Huson* ... 9
dyeing with liposome system: stability of systems and application on untreated wool *de la Maza, Parra, Bosch, Coderch* ... 406
frictional properties of: fabric smoothness, friction, and handle *Ajayi* ... 52
moisture and heat diffusion in: two-stage sorption model of coupled diffusion *Li, Holcombe* ... 211
moisture buffering of: behavior of hygroscopic fabric during wear *Li, Holcombe, Apcar* ... 619
prickle of: perceived comfort of wool knitwear *Naylor, Veitch, Mayfield, Kettlewell* ... 487
relaxation shrinkage of: relationship between hygral expansion, extensibility, and shrinkage *Cookson* ... 44
shrinkproofing of: degradative processes: lipid modification *Coderch, Soriano, Pinazo, Parra, Erra* ... 704
shrinkproofing of: degradative processes: protein modification *Coderch, Pinazo, Erra* ... 302
thermal conductivity of: heat transfer through moist fabrics *Schneider, Hoschke, Goldsmid* ... 61
treated with anionic surfactants: substantivity of various surfactants subjected to dyeing conditions *Holt, Kelson, Reddie* ... 140
water and heat transport through: layered fabrics: effect of chemical nature of fibers *Yasuda, Miyama, Yasuda* 227
whitening and shrinkproofing: optimizing Hercosett/optical brightener agent/hydrogen peroxide on untreated wool *de la Maza, Manich, Parra, de Castellar* ... 162
Wool Fibers
alcohol penetration of: also hair: fluorescence microscopy study *Jurdana, Leaver* ... 463
azo dyes on keratin derivatives: effects of added metal ions on interaction of wool keratin and azo dye carrying hydroxyl groups *Kim, Kono, Takagishi* ... 275
fatty acid levels in: effects of processing on bound and free fatty acids *Negri, Cornell, Rivett* ... 381
moisture absorption in: multilayer absorption and application to fabric steaming *Le, Ly* ... 648
textured wool carpets: evaluating loss of definition using mathematical morphology *Sobus, Pourdeyhimi, Xu, Ulcay* ... 26
wool/speciality fiber blends: SEM quantitative mixture analysis: compared with light microscopy *Wortmann, Wortmann* ... 423
Wool Yarns
blend irregularity in: image processing analysis: applying system to actual yarns *Watanabe, Kurosaki, Konda, Nishimura* ... 729
Wool, Raw
color of scoured wool: formation of iron sulfides during scouring and their effect on the color *McLaughlin, Leonard* ... 516
yellowing of: effect of external lipids on process *Wojciechowska, Pielesz, Włochowicz* ... 580

X-Ray Diffraction
of PET POY: effect of heat-setting temperature on hydrazine treatment *Niu, Wakida, Ueda* ... 575
of never-dried cotton: effect of alkali treatment on enzymolysis *Bhatawdekar, Sreenivasan, Balasubramanya, Paralikar* ... 290

Yarns
air-jet textured cotton: improved comfort: carded spun compared with combed spun yarns *Srinivasan, Sengupta, Kothari* ... 169
blend irregularity in: image processing analysis of model yarns *Watanabe, Kurosaki, Konda, Nishimura* ... 690
blend irregularity in: image processing analysis: applying system to actual yarns *Watanabe, Kurosaki, Konda, Nishimura* ... 729
hairiness of: process of winding *Rust, Peykamian* ... 685
hand knitting yarns: psychophysical evaluation of tactile qualities *Jacobsen, Fritz, Dhingra, Postle* ... 557
manufacturing and quality: RotorRing measurement of fiber cohesion and bulk properties of staple fibers *Ghosh, Rodgers, Ortega* ... 608
mechanical behavior of: constitutive theory for short fiber yarns: mechanics of staple yarn without slippage effect *Pan* ... 749
mechanism of yarn failure: effect of interfiber friction on strength *Broughton, El Mogahzy, Hall* ... 131
strain rate of: influence on tensile test results *Vangheluwe* 586
tenacity data for cotton yarns: comparison of data from Uster Tensorapid, Dynamat II, and Scott skein testers *De Luca, Thibodeaux* ... 175
Yellowing
of scoured wool: formation of iron sulfides during scouring and effect on wool color *McLaughlin, Leonard* ... 516
of wool: effect of external lipids on process *Wojciechowska, Pielesz, Włochowicz* ... 580
